Filing Date: May 25, 2006 Attorney Docket No.: 038788.57653US

## Amendments to the Claims:

The listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims**:

1. (Original) A method for producing an organosilane, in which an organosilane represented by the formula (1),

$$SiX_nR_{4-n}$$
 (1)

(wherein X represents a halogen or alkoxide, n represents an integer of 1-3, and R represents an alkyl group or aryl group) is reduced, thereby producing a corresponding organosilane represented by the formula (2),

$$SiH_nR_{4-n}$$
 (2)

(wherein n represents an integer of 1.3, and R represents an alkyl group or aryl group),

which is characterized in that an aromatic hydrocarbon series organic solvent is used as a reaction solvent and that aluminum lithium hydride is used as a hydrogenating agent.

- 2. (Original) A method for producing an organosilane according to claim 1, which is characterized in that the reaction temperature is 40-120°C.
- 3. (Currently Amended) A method for producing an organosilane according to claim 1 or 2, which is characterized in that a substance that releases AlCl<sub>4</sub><sup>-</sup> ions in the organic solvent is used as a catalyst.
- 4. (Original) A method for producing an organosilane according to claim 3, which is characterized in that the catalyst is LiAlCl<sub>4</sub>.
